

AVIF0038 - Undertake aircraft underwater escape & survival

RHO Aviation Training Services provides Aviation Industry Aircraft underwater escape and survival training (**AVI AUES**) that develops the skills & knowledge that are required to undertake aircraft underwater escape and survival. The course covers – preparing for aircraft ditching, undertaking evacuation from an aircraft, conducting rescue recovery process, & controlling survival hazards.

The course has been developed for those aircrew and frequent flying passengers that travel in aircraft over water. The student base consists of aviation crews, emergency services, search & rescue and law enforcement agencies, including government and military personnel.

AVIF0038 - Undertake aircraft underwater escape and survival.

DURATION: 1 Day

LOCATIONS / DATES: Check the calendar on the website. Specialising in mobile training, we come to you.

AUTHORITY / REGULATOR

Nationally Recognised Training is developed by the Australian Governments Vocational Education and Training (VET) sector to ensure VET providers and practitioners develop students with the skills and knowledge needed to perform well in the workplace.

PRE-REQUISITES:

Medical Clearance:

Trainees will be required to provide a Medical Specification Form (MSF) prior to commencing the course. The MSF is to be completed by a Health Professional within 3 months of the commencement of training.

STRUCTURE & ASSESMENT:

This course encourages trainees to practically demonstrate and apply skills and knowledge to realistic underwater escape situations. Practical activities involve simulated helicopter scenarios. Trainees will be assessed using direct observation, oral and/or written assessment, and practical exercises simulating helicopter ditching scenarios.

CERTIFICATION:

Upon successful completion of the training, trainees will be issued with a Statement of Attainment in:

- AVIF0038 Undertake aircraft underwater escape and survival
(prepare for aircraft ditching, undertake evacuation from an aircraft, conduct rescue recovery process, & control survival hazards)

SKILL MAINTENANCE:

To maintain and align with industry expectations and to ensure ongoing competence and workplace capability, RHO Aviation recommends skills maintenance to be undertaken every 2 years.

SO WHY TRAIN WITH RHO AVIATION?

RHO Aviation provides safe compliant training and all of our instructors have comprehensive knowledge and experience in the subjects they teach.
